

Keepabl's Privacy Management SaaS 'Privacy-in-a-box'

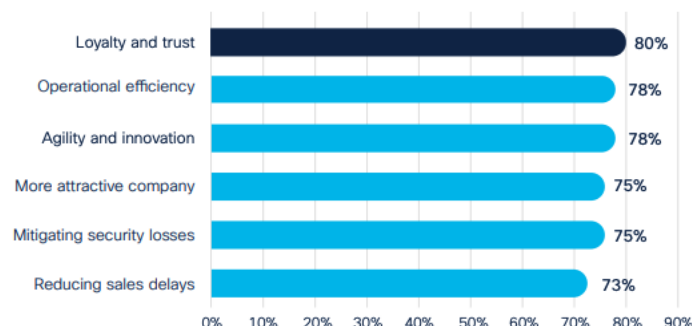

*"You can tell the product is built
by people who know Privacy and
really care for their customers"*

Find out more inside!

6 significant benefits from Privacy maturity

Percent getting significant benefits from privacy investment, 2023

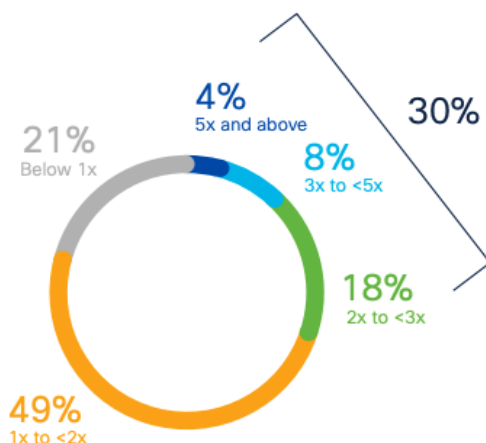

Source: Cisco 2024 Data Privacy Benchmark Study

Cisco's 2024 Data Privacy Benchmark Study repeats and reinforces the findings from prior years. **Over 70%** enjoy 'significant benefits' or 'very significant benefits' in these 6 key areas because of good Privacy maturity.

Which organisation **doesn't** want to lead in these areas – and not get left behind?

Proven ROI from Privacy Investment

Source: Cisco 2024 Data Privacy Benchmark Study

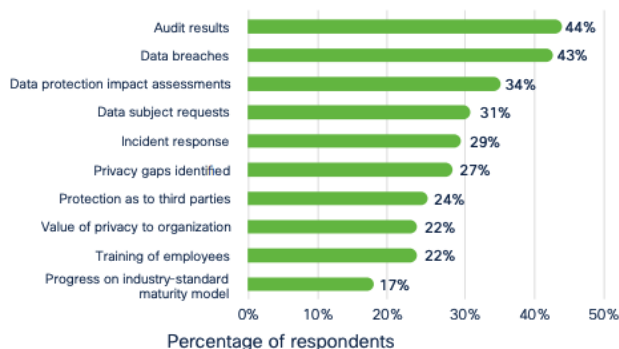

Cisco's 2024 Study again proves the ROI from Privacy investment. But that's not all - a leading independent Privacy consultant in the UK **believes Keepabl will save his clients between 50% and 70% on ongoing Privacy compliance** – that's a huge saving right there let alone the other benefits above.

What are you waiting for? Get these benefits for your organisation today!

98% of Boards receive Privacy metrics – what about yours?

Cisco's Study again shows how Boards need Privacy reporting to stay on top of their duties. If you're a director, or you report to the directors, is that process instant and intuitive?

Over half report 3 or more metrics – we've got you covered for those and more in Keepabl!

Source: Cisco 2024 Data Privacy Benchmark Study

**Want to save
50-70%**
of your ongoing GDPR
compliance costs?

'Keepabl cleverly automates many Privacy tasks for you, making compliance easier for everyone.'

Their holistic solution really accelerates compliance activities and I believe will save my clients 50-70% of their ongoing Privacy compliance over the next 3 years.'

*David Clarke FBCS CITP
Privacy & Security Consultant*

'We moved to Keepabl as it's much simpler than our previous service yet better in dealing with multiple entities. It makes ongoing compliance and reporting easier, and its breach and risk modules are really excellent.'

We're delighted to have a solution that has such a positive effect on how we work and meet ongoing GDPR compliance across countries.'

Canaccord Genuity Wealth Management UK & Europe

'We needed something with an intuitive interface and straight-forward set-up, all while alleviating the pressures of a small team managing data protection on a regular basis in a fast-growth business.'

Set-up was quick and easy, and Keepabl helped us rapidly establish our Privacy Framework. With instant reports, like the Risk Map, Article 30s and Vendors, we had an immediate ROI.'

FundApps

'With Keepabl's solution, the team can now easily manage ongoing compliance across 3 countries, with everything in one place.'

Keepabl's Dashboard helpfully visualises our GDPR KPIs. We can give stakeholders tailored access, and we can work more efficiently with our external advisers. All this saves me lots of time – and stress!'

Keepabl gives you Red-Amber-Green **Benchmarks** and detailed **Gap Analysis**, interrogating your Data Map in real-time. So you can see where you are and identify your remediation priorities.

Keepabl's BenchMark

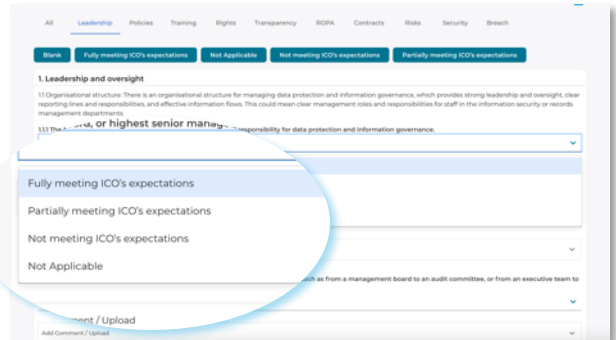

A strategic-level, 83-question framework against **EU & UK GDPR and UK PECR**. Easy to use, giving you an overall score, broken down into 7 main areas, then into 16 sub-areas.

Clearly signposting how you're doing and where you need to focus next.

The UK ICO's Accountability Framework

The UK ICO's gold-standard framework for GDPR – now in Keepabl!

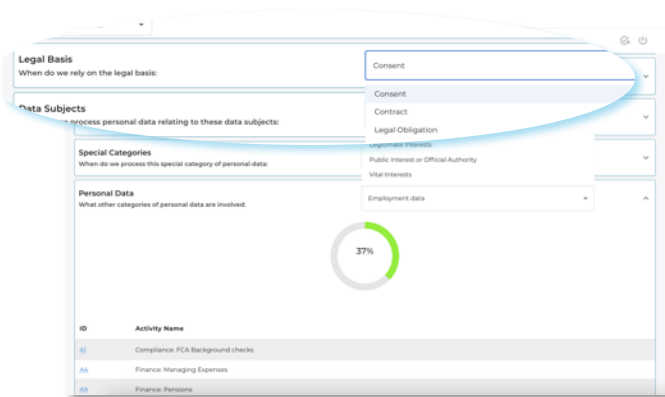

We've recreated the ICO's detailed, 338-question Excel version so you have all the official wording, questions and dashboard from the ICO plus all the benefits of SaaS.

Instant Activity Analysis

We've got your back at a tactical level too. Our **Activity Analysis** interrogates your Data Map in real-time, giving you instant answers to 27 key questions on your **Data Map**.

Whether you're remediating to reach compliance, or auditing and maintaining your governance, you need to know these answers.

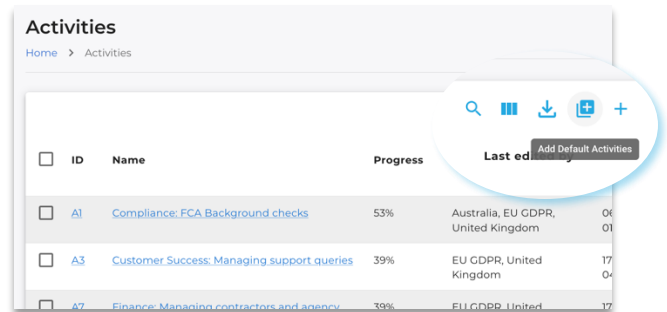

Easily create and maintain your **RoPA** with Keepabl's intuitive, international **Data Map**. Select any applicable regime for each Activity, with instant reports and KPIs for each jurisdiction.

Rapid Onboarding

Add our 46 **Default Activities** with a click, covering Sales to HR, Marketing to Finance. **Copy** any Activity to kick-start a new one.

Use **Upload Activities** to bulk upload Activities on an add-only basis.

Groups can have their own Default Activities, so group members get the best head start.

Select ANY Jurisdiction

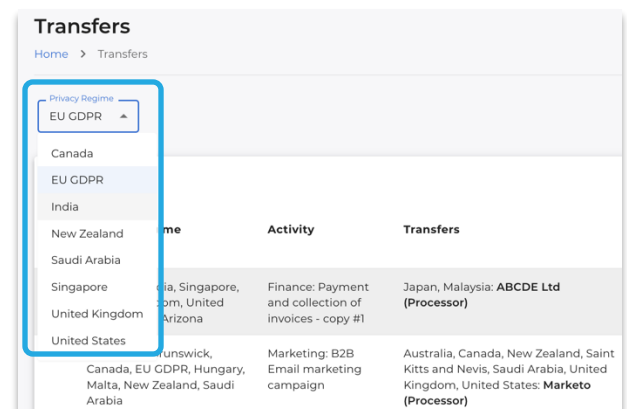

Privacy is more than GDPR (though most do model against GDPR then do local tweaks). So, with Keepabl's powerful Data Map, you can choose **any Privacy regime** on your Activities.

Not only that, you can **select multiple jurisdictions** including US states, Canadian provinces and territories, and individual EEA Member States - as well as US, Canada and EU GDPR.

Instant, Local, Reporting

From **Transfer Registers** to your **Dashboard KPIs**, see your Data Map reports for each of your selected jurisdictions.

So, if your Activities are subject to India's Privacy laws, select India in the Activity and we'll calculate transfers for that Activity based on India.

With **AI Governance** now the top priority for Privacy Pros, and 69% of Chief Privacy Officers have additional responsibility for AI governance¹, Keepabl’s Activities surface **AI & Automated Decision-Making**

AI & Automated Decision-Making

Does this Activity involve a decision with legal or similarly significant impact on an Individual?

Yes

Are the personal data used for automated decision-making, including profiling?

Yes

Please describe the automated decision-making or profiling:

Normal B I U

Automated Decision-Making

We’ve always asked about ADM, and we’ve now expanded the question set to cover all the key points you need to surface: use of ADM, the level of human involvement, and where ADM’s happening in your **Data Map**.

Upcoming releases will add more instant analysis in this area.

Artificial Intelligence

We’ve introduced a new section capturing key information on where you use AI, which AI, and your AI Assessment.

You’ll shortly be able to use Keepabl’s Template AI Assessment or build your own, in an imminent release of our **Assessments** module.

Is AI used in this Activity?

Yes

Please describe the AI used:

Normal B I U

Have you carried out an AI Assessment?

Yes

Please upload the AI Assessment and other relevant information:

Our AI & ADM Roadmap

Upcoming releases will add more instant analysis on AI & ADM into **Activity Analysis**, our **Information Asset Register** to easily identify and manage AI, and our **Enterprise Risk** module to manage risks of any type, not just Privacy or Security risks, from the use of AI & ADM.

Keepabl surfaces **PIA Risks** for each Activity, meaning the risk to Individuals from your processing their personal data, with PIA Risk KPIs, a full PIA Risk Register and interactive Risk Map.

Identify Activities then Risk

To identify PIA Risk to individuals, first identify where you process their personal data. We ask for your risk rating for each Activity as you complete your Data Map.

And, to help with your risk rating, Keepabl's leading **Privacy Policy Pack** gives you a **Template DPIA**, with policy and procedure to guide you through the whole process.

Have you done a DPIA and identified the risk to the data subjects from this processing activity?

No

Yes

No

Please give your reasons for this risk analysis:

ID	Privacy Regime	Risk	Activity name	DPIA?	Emergency 'in transit'?	Emergency 'in rest'?	Technical and organisational measures?
A07	EU	Very high	IR Fund reporting - copy #1	No	Not specified	Not specified	No
A08	EU, UK	Very high	IR Fund reporting - copy #1	No	Not specified	Not specified	No
A09	EU, UK	Very high	Marketing: Strictly necessary cookies - copy #1	No	Not specified	Not specified	No
A10	EU, UK	Very high	Providing our SaaS solution to hotel customers	No	Not specified	Not specified	No
A11	Unspecified	Unspecified	Finance: Managing Expenses - copy #1	No	Not specified	Not specified	No
A12	UK	Unspecified	Finance: Managing Expenses - copy #2	No	Not specified	Not specified	No
A13	UK	Unspecified	Finance: Payroll - copy #1	No	Not specified	Not specified	No
A14	EU, UK	Unspecified	Finance: Payroll - copy #2	No	Not specified	Not specified	No
A15	UK	Unspecified	HR: Employee appraisals and performance management - copy #1	No	Not specified	Not specified	No
A16	UK	Unspecified	HR: Employee appraisals and performance management - copy #2	No	Not specified	Not specified	No

Privacy Risk Register

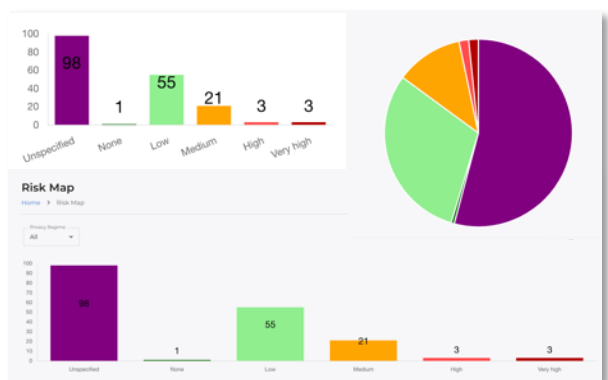

Your **Risk Register** contains all your Activities, sortable by risk rating, whether you've carried out a DPIA and more.

Linked to your Activities and visualisation, filter by risk rating to easily separate and identify the risk segment to focus on.

Interactive, Visual Risk KPIs

We instantly create your **Risk Map** and **Risk KPIs**. Choose your visualisation, filter by risk profile and zero in on high risk. All linked to your Data Map and Activities.

The Risk Map gives you a friendly nudge if you've not assigned risk to an Activity. So if your Risk Map looks good, you look good!

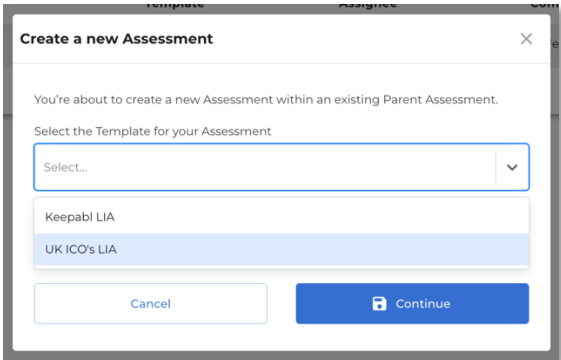

Keepabl’s **Assessments** module makes managing **DPIAs & Risk** a whole lot easier, as well as any Assessment you want

Easy Template Management

Choose which **Templates** are available to your Users, and switch between them easily. Deselecting a Template that’s already in use stops new Assessments on that Template but does not affect Assessments already in progress.

And with **Template Builder** (ETA May 2025), you can create your own Assessments, choosing from questions in existing Templates and our Model Question set.

ID	Parent Name	Type
<input type="checkbox"/> ASP1	Keepabl LIA Test	Legitimate Interests

<input type="checkbox"/>	ID	Name	Template	Assignee
<input type="checkbox"/>	AST1	LIA Test 2021	UK ICO's LIA	Sam Fowler
<input type="checkbox"/>	AST2	LIA Test 2022	Keepabl LIA	Sam Fowler
<input type="checkbox"/>	AST6	LIA Test 2023	Keepabl LIA	Sam Fowler
<input type="checkbox"/>	AST7	LIA Test 2024	Keepabl LIA	Sam Fowler

Parent - Child ‘Folders’

Assessments has a really useful Parent-Child ‘folder’ structure, which brings valued and practical benefits.

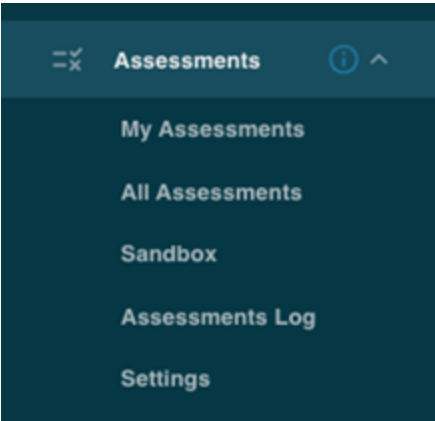

Say you’re doing an Impact Assessment called *DPIA on AWS Hosting*, which you’ll redo every year. You create a Parent called *DPIA on AWS Hosting* to hold all your actual assessments.

This means you can change templates over time, all stored within the same Parent folder. And there’s no double counting.

Phased release

The module follows the same structure as our popular **Rights** and **Breaches** modules, so it’s already very familiar. And we’ve added some exciting new roles and structure.

Assessments Phases 1 and 2 are in the app as at 20 April 2025, including all new roles, signatures, Parent-Child , the UK ICO’s DPIA, LIA, our Threshold Assessment and more. Template Builder (Phase 3) launches May 2025. We’re giving all customers a FREE TRIAL of Assessments until 31 May 2025.

Assessments introduces two new roles: Contributors and Signatories, and Assessments freeze when status is changed to *For Signature*

The Assignee for this Assessment

This is the person in charge of performing this Assessment.

Robert Baugh

Contributors to this Assessment

Only the Assignee and any Signatory can add and remove Contributors on this Assessment. A Contributor must have View or Edit permissions to My Assessments so they can contribute.

Select...

Signatories for this Assessment

When the Assessment's status is changed to *For Signature*, it will be frozen and the Signatories will receive an email noting that the Assessment is ready for their review and signature.

Select...

Contributors

Assessments are collaborative, with the Assignee asking others for their input. Enter **Contributors**!

Contributors can do anything an Assignee can, apart from editing the top *Manage this Assessment* section, including status.

Add and remove Contributors as needed - they just need View or Edit rights to *My Assessments*.

Signatories

In practice, everyone wants a signature on your assessments. So, we've introduced the role of **Signatories**!

You can assign multiple signatories to a record and the Assessment will only be marked as completed when all Signatories have signed. (The ability to set a signing order is coming in Phase 2.)

We'll create a PDF of the final executed Assessment, which is also in your **File Library**. Choose and manage your signature in *My Account*.

Edit Signature

Are any of the individuals vulnerable?

GDPR requires consent as a category of individual whose interests need particular care and attention in L&Es. Other vulnerable individuals might be the elderly, the infirm, and those with dependent on others. Check your policies and procedures to confirm who your organisation considers to be vulnerable individuals.

Select...

Personal data: special categories

Please select any special category of personal data to be processed. If a special category was selected on one of your chosen Activities, it is already selected below and can be deselected. Choose all that apply.

None

Political opinion

Religious beliefs

Philosophical beliefs

Trade union membership

Genetic data

Biometric data to uniquely identify an individual

Health data

Race data

Sexual orientation

None

Personal data: criminal convictions and offences

Is personal data related to criminal convictions and offences or related security measures to be processed? If such data is processed in an existing Activity you selected above, we have pre-selected 'Yes'. You can change the answer.

No

Personal data: other categories

Please select other relevant categories of personal data for this Assessment. All existing categories from your Activities are below. We have pre-selected any category selected on one of your chosen Activities. To change or add a category, please go to the relevant Activity to make that change or addition, and it will appear here. Choose all that apply.

Age-related data of data

Reasoning I.Q.

Security responses

Freezing / Unfreezing

When an Assessment's status is changed to *For Signature*, all Signatories receive an email with a link to the Assessment, and they can decide whether to sign.

When it's moved to *For Signature*, we also freeze the Assessment, so that Signatories all review the same version.

An Assessment can only be unfrozen if a Signatory declines to sign, or the Assignee changes the status back to *In Progress*, to keep working on it.

Implement your organisation's **Risk Methodology** in Keepabl by tailoring our **Risk Engine** to apply to all Assessments for consistency

Risk = Likelihood x Impact

Each Risk's level of risk (or **Risk Rating**) is calculated by multiplying likelihood (L) by severity of impact (I), on a 1 to 5 basis.

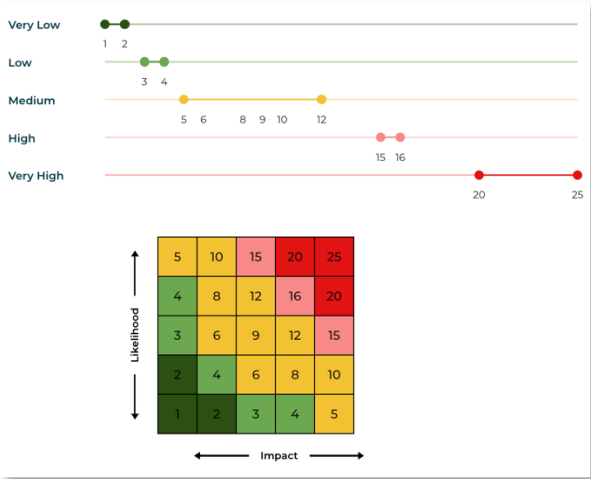

You can use our default labels (from *Very Low* to *Very High*) or customise them in **Risk Settings** to match your organisation's risk methodology and vocabulary.

Risk Heat Map

Easily tailor your **Risk Heat Map** to match your risk methodology.

Likelihood and Impact are on a 1 to 5 basis, so your Risk Heat Map is on a 1 to 25 basis, split into 5 categories.

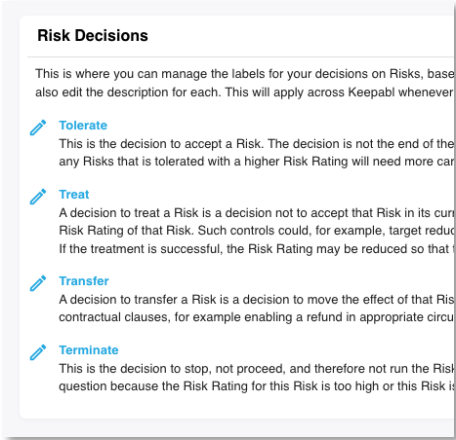

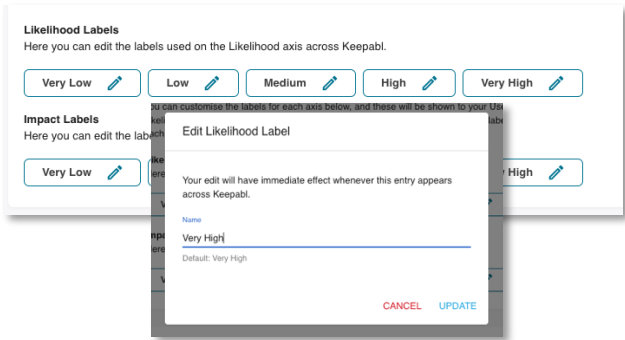

Edit your category labels and colours (have just 3 colours if that's your thing), as well as the range of each category using our **super intuitive interface**.

Risk Decisions

Risk decisions in Keepabl are based on the famous '**4 T's**' which are **Tolerate, Treat, Transfer, and Terminate**.

Like all other areas of our Risk settings, this is **fully customisable**. You can adapt the labels for your decisions as well as the descriptions attached to each decision.

Simply intake and manage Rights under GDPR and other laws with **Rights**. Unlimited Forms to intake Rights. Simple workflow and process management. Excellent reporting.

Unlimited Forms

Enter Rights directly into Keepabl or use our easy Form Builder. Unlimited online Forms you can tailor to your audience, that feed straight into your Rights solution.

Have separate Forms for your Privacy Policy, for your Ops or Customer Support colleagues and processors.

Instant Visual Reporting

Instant reporting with all the KPIs you need to monitor and manage this key ongoing aspect of your Privacy Governance.

Visual reporting on how many Rights you receive, what type, where from, how efficient you're dealing with them, and more. Easy to share with senior management and the board.

Manage and Automate

Simple workflow management with default Assignees and default Approvers so you can manage workload.

Your instant and automatic **Rights Log** is searchable, sortable, and downloadable. And each User with a role on a Right has their own **My Rights** dashboard to see and manage Rights assigned to them.

ID	Right Type	Individual	Our Role	Accepted	Assignee	Approver	Status	Start Date	Original Deadline	Extended Deadline	Days Left	Completed Date
15	Withdraw Consent	Peter Parker	Controller	Yes	Walt Disney	Robert Baugh	Open	July 15, 2023	August 15, 2023 12:00 AM	No	Not specified	Not specified
16	Object to Automated Decision Making or Profiling with Legal Significant Effects	Alan Scott	Processor	Not specified	Walt Disney	Robert Baugh	Open	August 8, 2023	September 8, 2023 12:00 AM	No	Not specified	Not specified

20	Correct	Hulk	Controller	Yes	Robert Baugh	Robert Baugh	Not	August 14, 2023	September 14, 2023 12:00 AM	No	Not specified	Not specified

Easily intake suspected **Breaches** with our unique Breach Button URL.
Instant **Breach Log**. And instant email alerts so you can react within
72 hours, if notification is needed.

Capture Breaches even without a Keepabl account

Ensure you're aware of Breaches as early as possible. The team can enter Breaches directly - and you can let your colleagues report a Breach even if they don't have a user account.

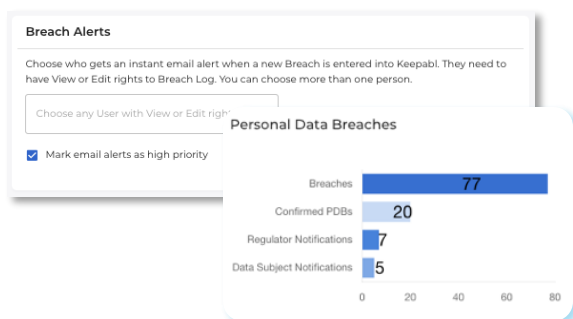

Put your unique 'Breach Button' URL on your intranet for a secure way to report suspected breaches.

Example PD Breach form fields:

- Are you already aware that this was a Personal Data Breach?
- Give this PD Breach a short name
- Who in your organisation discovered the PD Breach?
- Who in your organisation is in charge of investigating the PD Breach?
- Was the PD Breach caused by a cyber incident?
- Describe the PD Breach, in as much detail as you can.
- Choose who gets alerted when a New PD Breach Record is started here. Just enter their email.

Selected email addresses:

- robin@gotham.com
- robertdemo@keepabl.com
- batman@gotham.com

Instant Alerts & Visual KPIs

Instant **email alerts** with a link to the Breach ensure you can react within GDPR's 72 hrs. The alert takes you straight to the Breach, which is already in your Breach Log. Take the Breach forward with product nudges on the need to notify.

Interactive Dashboard reporting simplifies reporting to the senior leadership.

Instant Breach Log

Just like your Art 30 Records, we create your **Breach Log** for you, instantly updating it as you update underlying Breach records.

Share it online with tailored access for colleagues or easily download the Excel for external parties. Linked to your Processors so you can see what other data may be at risk.

PD Breach Log

PD ID	PD Breach Name	PD Breach?	Type of breach	# people affected	Special categories involved?	Criminal offences involved?	Other personal data categories	Date Disclosed	Date Reported	Date Closed	Supervisory Authority
PD001	Lost laptop on train	Yes	System data/hardware	5,000	Yes	No	Age and/or Date of Birth	18-09-2018	18-09-2018	18-09-2018	Updated 1 UK ICO 16-10-2018 Updated 2 UK ICO 18-09-2018 Notification Updated UK ICO 09-10-2018
PD002	Incorrect email recipient	Yes	Disclosed in error	3,000	Yes	Not specified	Employment data, list of services	18-09-2018	18-09-2018	18-09-2018	Risk notification UK ICO 02-10-2018 Notification Updated UK ICO 09-10-2018

Download options: CSV, Excel

See why David Clarke, UK Privacy & Security Consultant says Keepabl will **save his clients 50-70% of their ongoing Privacy compliance** over the next 3 years.

Driving Ongoing Compliance

As you complete your Activities, we instantly create the valuable reports and insights you need to get the job done on GDPR.

Article 30 Records

They're a key ongoing requirement in GDPR. So the first question asked in due diligence is: "have you got your Art 30 Records?"

We instantly create them for you - for both UK / EU GDPRs and as Controller / Processor.

The screenshot shows the 'Article 30 Records (Controller)' interface in Keepabl. It features a sidebar with navigation options like 'Your Dashboard', 'Benchmarks', 'Data Map', 'Risk Map', 'Reports', 'Article 30 Records (Controller)', 'Activity Register', 'Transfers', 'GD Branches', 'Vendors', 'Entities', 'File Library', 'Tasks', and 'Account Settings'. The main content area displays a table with columns: Processing Activity ID, Privacy Regime, Processing Activity Name, Purpose of processing, Joint controllers, Categories of data subjects, Categories of personal data, Categories of recipients, and Transfers to countries outside the UK. The table contains one row of data for 'EU, UK' with details on compliance, processing activity, and data categories.

Tactical Gap Analysis

Alongside the benchmarks, we give you answers to the 27 questions you must know the answer to, such as "where do we rely on consent?", "where don't we encrypt at rest?" and "where don't we have a compliant DPA?"

Processor Analysis

Interactive registers of your Processors and Sub-Processors surface key due diligence considerations, with deep dives on individual entities.

The screenshot shows the 'Processors' interface in Keepabl. It features a sidebar with navigation options like 'Your Dashboard', 'Benchmarks', 'Data Map', 'Risk Map', 'Reports', 'Article 30 Records (Controller)', 'Activity Register', 'Transfers', 'GD Branches', 'Vendors', 'Entities', 'File Library', 'Tasks', and 'Account Settings'. The main content area displays a table with columns: Entity ID, Name, Address, Processing Activity, GDPR-compliant agreement in place?, Due diligence carried out?, and Sub-processors identified?. The table contains two rows of data for 'Microsoft Azure' and 'Microsoft' with details on processing activity and compliance.

Third Party Registers

Our Third Party Registers let you instantly answer questions such as "who are my controllers?", "where's my sub-processor list?" and "where does Company X appear in my processing?"

The screenshot shows the 'Third Parties Registers' interface in Keepabl. It features a sidebar with navigation options like 'Your Dashboard', 'Benchmarks', 'Data Map', 'Risk Map', 'Reports', 'Article 30 Records (Controller)', 'Activity Register', 'Transfers', 'GD Branches', 'Vendors', 'Entities', 'File Library', 'Tasks', and 'Account Settings'. The main content area displays a table with columns: ID, Third Party name, and Roles. The table contains ten rows of data for various third parties like Google, Amazon, Slack Solutions, Salesforce.com, HubSpot, Camo, ZenDesk, OutSystems Ltd, Slack, and WTC Parent Co, with details on their roles as processors or controllers.

You're used to **being in control**. You're used to the Shared Responsibility Model. You want languages. And you want to make sure you can take your information with you if you leave. We get it.

Integrated Task Management

Hang **Tasks** on Activities, DPIAs, Vendors. Set repeating Tasks to review due diligence annually or set up team meetings quarterly.

Comment and upload documents against Tasks. Assign Tasks to colleagues. appoint Approvers. Colour-coded, personalised Tasks Dashboard.

ID	Title	Module	Item	Creator	Assignee	Approver	Status	Created	Due Date	Closed Date
T43	Review Policy A	PD Breach Records	Lost laptop on train	Robert Baugh	Robert Baugh	Alec Guinness	open	2022	21-08-2022	
T40	DPIA on Health & Medicines	Activities	HIS: Managing employee sickness	Robert Baugh	Richard Grayson	Barbara Gordon	open	2022	14-08-2022	
T29	Set up team meeting	Activities		Robert Baugh	Alec Guinness	Sam Superman	open	medium	27-06-2022	27-06-2022
T21	Complete review for new entrants	Tasks		Robert Baugh	Robert Baugh	Richard Grayson	open	medium	09-06-2022	25-07-2022

UK ICO AF	<input type="checkbox"/>	<input type="checkbox"/>

2FA & SSO

2FA is a great way to defeat the vast majority of password-based attacks. We highly recommend enforcing it for your accounts.

And we've SSO with Azure AD, Okta and OneLogin, so you can manage Keepabl as you manage any other B2B SaaS.

Two-Factor Authentication (2FA)

2FA is enforced for all Users on this Organisation.
Congratulations! You've greatly increased the security of your Keepabl account. All your users now have to use 2FA as part of their authentication to use Keepabl. It's very simple, they can download a free authentication app like [Google Authenticator](#) or [Authy](#), and we'll send them an email with easy-to-follow instructions. If you turn off enforced 2FA, it will stay enabled for your users until they disable it. See our [FAQ](#).

Single Sign-On (SSO)

Setup Identity Provider

Everything you need to set up Identity Provider and enable SSO on your Keepabl Account.

Download all my data

This is for ALL your data in Keepabl in a single zip file. If you're looking for data from individual modules, such as all your Activities or all Breach Records, you may prefer to download those directly from the relevant module.

Download All

Download all your data from EVERY module and ALL files from your File Library in either Excel or CSV. Once you request a download the process will take up to 3 hours depending on how much data you have. We'll email you when it's ready and your file will be available to download here for 7 days.

(Not all providers offer this, and we've been told our downloads are particularly good.)

Download all your Data

Introduced as exit comfort but useful for your own business continuity processes, you can download all your data in valuable, usable CSV or Excel, there in a zip file for 7 days. Do it when you want.

Privacy Kitchen is hosted on YouTube and subject to their Privacy Policy and Cookie Policy

Free Privacy Training

Privacy Kitchen is a free video resource to help practitioners on GDPR and all things Privacy.

Dealing with everything from the basics to the advanced, in short, plain language videos.

Be confident on Vendor DD!

There's nothing worse than saying Privacy is core to your ethos and then not knowing what a controller is, or Article 30 Records, or a transfer...

Don't get caught out when trying to win business or win investment – easy ways to gen up on all things Privacy.

An Expanding Resource

We're continually adding to Privacy Kitchen's library of videos, with evergreen topics, videos on practicalities, on legal niceties and more.

From short 'Bite Size' videos, to 30-minute 'Coffee Break' interviews to 45-minute 'Bigger Break' roundtables with expert, practical 'Guest Chefs'.

[See all the videos on Privacy Kitchen](#)

'The team have been great and so supportive all the way through. Keepabl listens to its customers and implements feedback. We're very happy.'

Information Governance Manager and DPO

'Set-up was quick and easy, and Keepabl helped us rapidly establish our Privacy Framework. With instant reports, like the Risk Map, Article 30s and Vendors, we had an immediate ROI.'

Legal Counsel

'We implemented Keepabl ourselves first, and we've now implemented Keepabl with a professional services customer. We couldn't recommend Keepabl more: it's simple, comprehensive and lets you cover GDPR in a practical way for customers.'

MSP

Super Simple Onboarding

Your SuperAdmin is in full control! As soon as they activate their account, they can add Users, create other Admins, at any time - the power is in your hands!

Our FREE 3-call onboarding process takes your key users through the service in more detail, so you get a racing start with our Default Activities, Upload and more!

Keepabl Support is always here (on support@keepabl.com, but you can contact us how you like) to help with any product queries and to hear any feedback!

And if you're a Group, we've lots of ways to make onboarding super simple, such as a dummy org to create your own set of default Activities, which we can copy to your group members.

All in a Secure SaaS Solution

Security and Data Protection are in our DNA, so we've great policies and procedures in place. We're pen tested annually and we're certified to Cyber Essentials Certified Plus annually. We'll happily share our **Privacy Overview** and **Security Overview** with more details.

And as part of our corporate social responsibility, we voluntarily produce a Modern Slavery Act Statement. We even plant a tree for each customer each month of their subscription for free!

Thank you!
