

# Groups

Why Keepabl is the best  
Privacy SaaS for Groups

*From onboarding to offboarding,  
we've got you covered*

Everything  
is  
connected

# Easy Group Privacy

**From onboarding to offboarding – how to move your Group members onto a uniform approach to managing, and reporting on, Privacy?**

**We've got you covered:**

- ✓ 4 great ways to rapidly build the Data Map for all your Group members
- ✓ Each entity has its own Keepabl account, easily manageable
- ✓ Least privilege access on an account basis makes onboarding, collaboration and offboarding super simple

# Your Data Map

## 4 Ways to Turbocharge your personal data inventory

Your personal data inventory, the Data Map in Keepabl, is the foundation of your Privacy Compliance. We've 4 ways to get you up and running fast, no matter how big your Group.

### One-Click Default Activities

Our most popular onboarding benefit: a curated set of 46 of the most common processing activities such as *Recruiting*, *Payroll* and *Sales calls*, already 40% completed for you.

One click and they're in your account. Complete them, delete them, copy them to create new ones ... you'll have an awesome-looking Data Map in no time.

And because Keepabl instantly creates and updates your key GDPR records as you complete your Data Map, each Group member will have their own instant:

- Data Map,
- Article 30 Records (Controller),
- Article 30 Records (Processor),
- Activity Register, and
- Activity Analysis.

Don't forget everything in Keepabl is downloadable so you can share these offline as you're used to.

# Your Data Map

## 4 Ways to Turbocharge your personal data inventory

### Upload Activities

Our much-requested Upload Activities\* lets you complete your Activities offline in an Excel sheet (we know some of you still like working that way, no judgement... ) and then easily upload them to your Data Map.

We provide a simple-to-use Excel Template, closely matched to the Activities in Keepabl, so the upload will work first time!

# Your Data Map

## 4 Ways to Turbocharge your personal data inventory

### The 'Cookie Cutter' approach

As part of our standard onboarding for Groups, we can copy across the Data Map from one Group member into another Group member's account in Keepabl.

So you can work on getting one Data Map where you want it as a template for your Group, let us know and we can copy that across to your other Group members so they all start from the same place, tailored to your Group's activities.

### Get **your own Default Activities!**

As an extra step, particularly for Groups expecting dynamic membership, we can create a separate account for you to house your very own Default Activities.

Then you can then drop into your Group members whenever you wish. You can update your Default Activities whenever you want. And it makes onboarding new members super simple.

The ultimate tailored approach.

# Uniform approach, rocketship insights

All Group members will have the same approach to Privacy Compliance

Each entity will have an impressive Privacy solution, with instant reports and KPIs

Keepabl's Privacy Policy pack ensures uniform practices across the Group

Save up to 70% of your ongoing time and costs of Privacy compliance across the Group\*

\* See the case study from David Clarke, UK Privacy & Security Consultant, on our website

# Tailored Access on an Account Basis

Least Privilege Access allows you to give exactly the access you want

You might be an Admin on one account but only a restricted viewer on another

Give the Group Privacy Lead access to all accounts and Member Leads access to theirs only

Unique *Breach Buttons* for non-Keepabl users to report suspected breaches, email alerts to your central Security team to react within the 72 hour deadline

Easily enable users on new members and exit users on leaving members

# Membership Changes

Keepabl makes onboarding and offboarding Group members a simple process

New members get:

- an instant Data Map from from our (or your own) Default Activities, upload, or the cookie cutter approach,
- instant Article 30 Records, KPIs and reporting that fits with the rest of the Group,
- a comprehensive Privacy Framework out of the box, including breach reporting and
- your comprehensive Privacy Policy Pack

Add existing colleagues to help or manage new member's accounts with the rights appropriate for their role

Support leaving members' valuation and send them on their way with a world-class Privacy Framework

# Traction

*'will **save my clients 50-70%** of their ongoing Privacy compliance over the next 3 years'*
