

FundApps, a rapidly growing tech firm specialising in compliance monitoring, sets up their Privacy Framework using Keepabl's intuitive and familiar SaaS solution

'We were looking for a tool to automate the more administrative Privacy processes and allow our small team to focus on more impactful work.

Set-up was quick and easy, and Keepabl helped us rapidly establish our Privacy Framework.

With instant reports, like the Risk Map, Article 30s and Vendors, we had an immediate ROI.

We're really enjoying the platform and looking to utilise even more of Keepabl's automation functionality throughout the year.'

Alena Kararic
Legal Counsel
FundApps

THE CUSTOMER

FundApps provides automated compliance monitoring services to financial institutions. This includes some of the world's largest asset managers, hedge funds and investments banks.

Founded in 2010, FundApps is used to monitor over US\$17 trillion in client assets every day.

FundApps enable compliance teams to respond efficiently to regulatory change, increase certainty and reduce complexity associated with the compliance processes.

FundApps prides itself on their team of compassionate individuals who genuinely care about their clients and their needs.

THE PRIVACY CHALLENGE

Despite being a growth tech company, the Legal team tasked with looking after the organisation's Privacy Governance is small and will likely remain a similar size as the company scales.

As Alena Kararic, FundApps' Legal Counsel, notes: *'We needed something with an intuitive interface and straight-forward set-up, all while alleviating the pressures of a small team managing data protection on a regular basis in a fast-growth business.'*

The Customer FundApps

The Challenge
Looking for a tool to establish and automate their Data Protection Framework.

The Solution
Keepabl's SaaS Solution

The Results

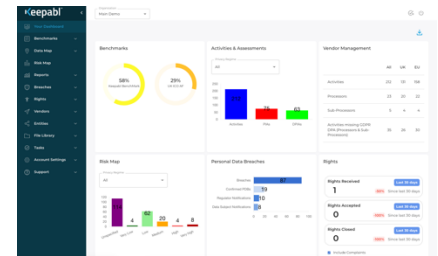

- o Straight-forward onboarding and excellent on-going support
- o Easy to upload and maintain the RoPA
- o Instant Privacy KPIs and reports
- o Email alerts and workflow automation
- o Fully customisable, unlimited intake Forms

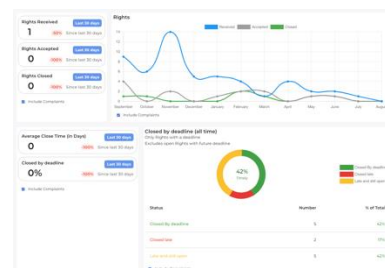

THE SOLUTION

Keepabl's user friendly and intuitive interface empowers our users with quick set-up tools and seamless ongoing maintenance.

Keepabl boasts a range of useful onboarding tools. Multiple upload templates, as well as 40+ default processing activities to give you a great starting point.

Screenshots are examples only, not from a customer instance

THE RESULTS

FundApps started by uploading their RoPA using our simple Activities Upload Template.

Alena states: *'Uploading the RoPA was so straightforward. With just a few clicks we had everything in the system, with fantastic reports like the Risk Map and Entities Register. These were perfect at helping us identify our gaps.'*

FundApps will look to utilise even more of Keepabl's automated functionality throughout the year, starting with implementing Rights and Breach intake Forms.

'We're currently setting up our intake Forms, ready to roll out to the rest of the organisation, with both public-facing and internal-use Forms.'
