

LSE-listed Gamma Communications plc selects Keepabl to automate and accelerate their compliance framework across the UK and Europe

'Onboarding with Keepabl was great. Super quick set-up and the migration of our data from our legacy provider was painless.

Keepabl makes managing our different group members seamless, and the insights and reporting are instant, delivering what we need for audits and reporting.

Automation has elevated our governance, including being able to easily create and manage Assessments. The support provided has been excellent, they really listen.'

Matthew Robinson
Data Governance Manager
Gamma Communications

THE CUSTOMER

Gamma Communications plc is a listed, tech-based communication solution provider, operating across the UK and Europe.

With over 2,200 employees and listed on the Main Market of the London Stock Exchange, Gamma helps organisations connect and collaborate through solutions including Unified Communications, voice enablement, connectivity, mobile and security.

Gamma's 'on a mission to make business communications less complex, and more human', which chimes perfectly with Keepabl's mission on Privacy compliance!

The Customer

Gamma Communications plc

The Challenge
Migrating from a different provider with separate multi-group jurisdictions

The Solution
Keepabl's SaaS Solution

The Results

- o Fast, simple migration from previous provider
- o Seamless management of group organisations across multiple jurisdictions
- o Transparent reporting
- o Customisable automation from Forms for Rights and Breaches to customisable Assessments

THE PRIVACY CHALLENGE

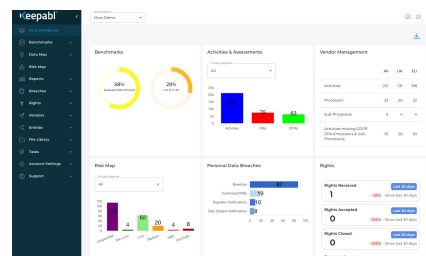

Migrating comprehensive Privacy governance from a legacy solution, Matthew Robinson (Gamma's Data Governance Manager) needed to ensure a rapid and smooth migration, and that Gamma's Privacy compliance was transparent and easily managed by his international team as soon as possible.

As Matthew noted: "Our previous Privacy tool was straining to keep up with Gamma needs, as a rapidly growing group. We've a robust B2B business model, we're acquisitive, and we're international. We needed a solution that supported this growth and complexity and that allowed me to delegate authority transparently and appropriately across the team.'

THE SOLUTION

Keepabl's global Privacy tool is an out the box, all in one solution that caters to all your Privacy needs.

Whether it's populating the RoPA, creating and managing your own Assessments, intaking Breaches/Rights, or managing your Third Parties or Data Transfers, Keepabl has got you covered!

Screenshots are examples only, not from a customer instance

THE RESULTS

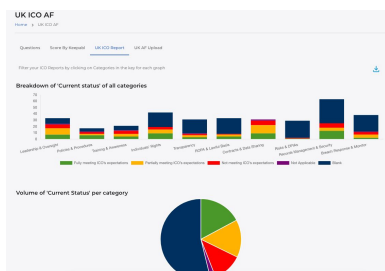

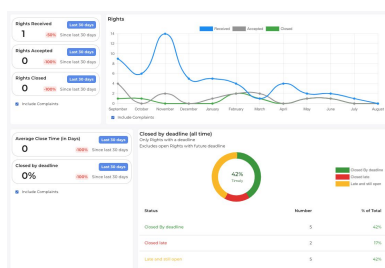

With Keepabl, Gamma can fully customise their templates and work in a way that works best for them.

Matthew states: *'We created our DPIA template in Keepabl and our Users couldn't believe how easy the template builder was to use. You can tell every bit of Keepabl is created with the end user's experience in mind'*

Gamma now has a holistic view of all their groups and the Third Parties that they work with.

'It's so easy to switch between our different group members, each with their own instance and instant Article 30, reports, Third Party register and logs for Breaches and Rights.'

The move to Keepabl was smooth and is delivering great benefits already.'

The screenshot shows the 'Personal Data' form. It has a header section with checkboxes for 'All UK ICO AP', 'All UK ICO AP', and 'All UK ICO AP'. Below this is a section for 'Personal Data' with various categories like 'Name', 'Address', 'Contact details', etc., each with a checkbox. At the bottom, there is a section for 'Other categories of personal data' with checkboxes for 'All UK ICO AP', 'All UK ICO AP', etc.
